July 16th, 2015

Dear Customer:

Enclosed in this package, please find the Jacksonville SW1 Production Version Release providing software support for our new Intel® Ethernet Connection I219 (Jacksonville). Jacksonville is the Intel Ethernet PHY that aligns with Sky Bay/Skylake ULT & ULX Platforms.

Version V20.2C00099 TIC 377811

Components are feature complete and there are no known issues being addressed by engineering.

Use of this software and any accompanying documentation (collectively the “Software”) is subject to the terms of the Intel Software License Agreement included on this CD. By installing or using the Software, you agree to the terms of the Agreement. If you do not wish to so agree, do not install or use the Software.

If you discover any issues during your testing, please enter them into IPS or contact your Intel technical representative. This will allow us to track and coordinate issues more effectively. The earlier these issues are raised, the easier they are to address in the next release. We look forward to hearing from you.

Best Regards,

Intel CCD OEM Product Marketing Team
